Work Model

Uncomplicate. That is the mission. Our work model is guided by **objectivity** and **simplicity in communication**, without giving up the depth that legal matters may involve. More than solving problems, we work to understand and see them with the customer's eyes and, above all, to **prevent them**.

With prompt and accurate service, we always have a specialist lawyer to assist you in the most diverse branches of Business Law, with emphasis on matters involving the areas of Civil, Labor, Criminal, Corporate and Competitive Law.

In a country with a high level of conflict judicialization, it is always good to have a suitable professional. Therefore, we represent our clients in all instances and courts. Contracts and Training

We review and elaborate on all contracts and documents related to customer activities. In addition, we also provide in-company training to align team conduct with good legal practice. With objective analysis and no "juridiquês" (unnecessary and excessive use of technical terms of law), we seek to understand the client's interests in-depth and thus offer the most effective solutions.

Do not worry. We offer several hiring formats. Either per hour, per process, per package or monthly fee. One of them will surely fit like a glove in your budget.
